

Resolution of Expression of Concern: Tuning In, Not Turning Out: Evaluating the Impact of Ethnic Television on Political Participation

Resolution of Expression of Concern: This is an update to the Expression of Concern published on 25 June 2019 (the original text is included below) for the article “Tuning In, Not Turning Out: Evaluating the Impact of Ethnic Television on Political Participation” by Yamil Ricardo Velez & Benjamin J. Newman (<https://doi.org/10.1111/ajps.12427>), published online on 15 April 2019 in Wiley Online Library (wileyonlinelibrary.com). It is published at the request of the Journal Co-Editors Kathleen Dolan and Jennifer L. Lawless, in agreement with Wiley Periodicals, Inc. The Resolution of Expression of Concern is published to alert readers that, while the authors of the paper believed they had sufficient authorization to use the 2012 Latino Decisions Election Eve Survey data in the article’s analysis, the appropriate Latino Decisions principals had not granted that permission. Following an investigation, the Journal Co-Editors have decided to let the published article stand and will take no further action. Latino Decisions agrees with this decision. The dataset has been removed from the Journal’s Harvard Dataverse webpage.

This Expression of Concern relates to the article “Tuning In, Not Turning Out: Evaluating the Impact of Ethnic Television on Political Participation” by Yamil Ricardo Velez & Benjamin J. Newman (<https://doi.org/10.1111/ajps.12427>).

This Expression of Concern is for the above article, published online on 15 April 2019 in Wiley Online Library (wileyonlinelibrary.com), which has been published at the request of journal Editor Jan Leighley, in agreement with Wiley Periodicals, Inc. The Expression of Concern is published due to the possibility that the authors did not have sufficient authorization from Latino Decisions to use the 2012 Latino Decisions Election Eve Survey data used in the analysis. This concern arose following notification to the Editor that the data posted on the AJPS Harvard Dataverse webpage (<https://dataverse.harvard.edu/dataverse/ajps>) were proprietary and had not been authorized for use in the article at the time the manuscript was submitted for peer review, nor approved for posting upon publication, consistent with the AJPS Replication Policy. Further actions by the Journal will be taken once the results of an investigation into the authors’ rights to use the data during peer review and in the published manuscript have been announced.
